The products and treatments proposed in this document may be subject to specific regulations. Users or purchasers are responsible for verifying the regulations applied in the country of use, as well as the specific conditions of use of this equipment with the correct authorities and their distributor. In the United States of America the authorized claims by the FDA are: removal of unwanted hair from phototype skin I to V, treatment of benign cutaneous vascular lesions from phototype skin I to III, treatment of benign pigmented epidermal and cutaneous lesions from phototype skin I to III, treatment of inflammatory acne from phototype skin I to III.

THE PULSED LIGHT EXPERTS

Our searches, our innovations, our knowledge

Unique system, functioning, pulsed light

Simplier, faster, more functional

Our quality, our patents, your safety

Clinical studies, scientific articles

Created in 2000, DERMEO company quickly established itself as the French designer and manufacturer of medical devices of pulsed light through its industrial experience. Indeed, DERMEO offers high quality innovative systems and brings together the latest available technology.

LAMP CARTRIDGE

Thanks to investments in its Research and Development department, DERMEO has developed a water cooled LAMP-CARTRIDGE, interchangeable directly by users in only a few seconds and without the need for engineer intervention on site or in the workshop. Indeed, this innovation allows to get back to the use of his device in 10 seconds.

In only 10 seconds, the operator can change the water cooled LAMP-CARTRIDGE

INTERCHANGEABLE OPTICAL UNIT

The hand piece DERMEO devices are equipped with a cartridge and an optical unit. Also, various applications of pulsed light DERMEO devices are easily obtained by replacing the optical unit containing the filter. Thus, DERMEO has also developed a patented and interchangeable optical unit which can be replaced in 5 seconds and does not require the shutdown of the device.

In 5 seconds, the operator can change the indication

DERMEO, A GUARANTEE OF SAFETY AND PROFITABILITY

Thanks to its competences and its fast and efficient live after-sales service, DERMEO provides you with the know-how of a certified specialist complying with standards ISO 9001 and ISO 13485.

Conforming to the applicable European regulations, DERMEO has class IIb EC medical marking on its devices used for medical treatments, and also UL marking for North American countries, and the Certificate of Free Sale. DERMEO devices are FDA and Health Canada approved and respect recommendations of quality systems regulations for Good Manufacturing Practises by the Ministry of Health of these countries.

profitability and a FREEDOM package, cheaper in term of price, allowing users to pay according to their use. With this last option, the break even point of the device is more easily reached without resorting to credit. Resellers create a park of installed devices generating an insured and stable turnover and FREEDOM formula is very easy to manage because pack of flashes are easily purchased on internet through an online shop

DERMEO offers a PREMIUM package for immediate profitability and a FREEDOM package, cheaper in term of price, allowing users to pay according to their use

DERMEO devices are FDA and Health Canada approved and are medical CE marked in class IIb

Moreover, DERMEO assists its clients in the practical use of their device by providing a user manual and two detailed training manuals including a theoretical and technical practice and commercial and practical part.

DERMEO devices are differentiated from the quality point of view but are equally well positioned in term of price and special offers. Indeed, DERMEO offers a PREMIUM package for immediate
